

Express™ I/Lp

Respiratory MLV with Lepto Pomona Vaccine

Description

Bovine Rhinotracheitis Vaccine Modified Live Virus and Leptospira Pomona Bacterin. Express I/Lp™ contains neomycin as a preservative.

Features

Contains IBR modified live virus plus *L pomona*.

IBR fraction stimulates serological and cell mediated immune (CMI) response.

2 mL dose.

Benefits

Provides a proven efficacious immune response in healthy, susceptible cattle.

Provides cattle with the capability to launch a serological and CMI response against an IBR challenge.

No milk withholding.

Advantages

Express I/Lp administration allows cattle to launch a serological and CMI response against an IBR challenge and provides coverage for *L pomona*.

Dosage & Administration

Rehydrate one bottle of modified live virus vaccine by aseptically adding one bottle of liquid bacterin diluent. Using aseptic technique inject a 2 mL dose IM. A 2 mL booster dose is recommended annually.

Precautions

Store out of direct sunlight at 35° - 45° F (2° - 7° C). Avoid freezing. Shake well before using. Use entire contents when first opened. Do not vaccinate within 21 days of slaughter. Do not use in pregnant cows or in calves nursing pregnant cows. Burn containers and all unused contents. Injection site swelling may occur. Anaphylactoid reactions may occur. Antidote: Epinephrine.

Uses

Express I/Lp is recommended for vaccination of healthy, susceptible cattle as an aid in the reduction of disease caused by IBR and *L pomona*.

Warning

Animal inoculation only. Accidental injection to humans can cause serious local reactions. Contact a physician immediately if accidental injection occurs.

Product Information

Name	Code	Size
Express™ I/Lp	109-311	20 mL 5x10 doses
	109-331	100 mL 5x50 doses

Highlights

- Protects against IBR-*L pomona*.
- IBR fraction stimulates a serological and CMI response.
- Use in cattle of all ages.
- 2 mL dose.

Indications: Recommended for the vaccination of healthy, susceptible cattle as an aid in the reduction of disease caused by Bovine Rhinotracheitis (IBR) virus and leptospirosis caused by *Leptospira pomona*.

Directions: Rehydrate one bottle of modified live virus vaccine by aseptically adding one bottle of liquid bacterin diluent.

Dosage: Using aseptic technique, inject 2 mL intramuscularly.

Storage: Store out of direct sunlight at a temperature between 35-45°F (2-7°C).

Disposal: Burn vaccine containers and all unused contents.
